

Padium

PROTECTION AGAINST OIDIUM

DEFINIITION

PADIUM contains different types of proteolytic enzymes that work together to destroy diseases caused by pathogens, isolated in a liquid matrix, and obtained from a fermentation. For the control spores, these enzymes damaging the germination of these, breaking pipes germination and growth of the mycelium (fungus adult), this would inhibit access of the pathogen to the plant through leaves to produce a zone inhibition that interrupts the growth of the disease.

APPLICATIONS

PADIUM product is a foliar application, and the overall dose 3L/Ha..

PREPARATION OF MIXTURES AND COMPATIBILITIES

PADIUM is compatible with products such as insecticides and microelements. It is also compatible with the use of non-penetrating, such as non-ionic surfactants.

NOTES AND ADVISES

The recommendations and information that we give are the result of wide and severe test. However, in the utilisation could take part a lot of factors which escape to our control (preparation of mixtures, application, weather, etc.)The company assures the composition, formulation and content. The user will be responsible of the damage caused (fault of efficacy, toxicity in general, residues, etc.), for not to follow the instructions in the label.
