

# Scudor

## THERMAL SHIELD

CONTENTS GUARANTEED: ( From gross matter)

Organic matter.....40 % w/w(40 % w/v)  
Density..... 1 gr/cc  
pH.....6

### DEFINIITION

**Scudor** is a liquid product used to avoid risk of freezing on plants. **Scudor** forms a thin film covering the plant surface and avoid the dehydration of it.

The application of **Scudor** protect plants from low temperatures (about  $-3^{\circ}\text{C}$ ), and high temperatures, because **Scudor** acts as a thermal shield.

### APPLICATIONS

Scudor is an organic product, may be used with **all kind of cultures**, because 30 days after applying it will be rot.

The mixture must cover all the surface to make effective the application.

As a general recommendation this product must be applied at 1,5 or 2%, without any other product.

### PREPARATION OF MIXTURES AND COMPATIBILITIES

The product always must be applied without any other fertilizier or phytosanitary treatment.

### NOTES AND ADVISES

The recommendations and information that we give are the result of wide and severe test. However, in the utilisation could take part a lot of factors which escape to our control (preparation of mixtures, application, weather, etc.)The company assures the composition, formulation and content. The user will be responsible of the damage caused (fault of efficacy, toxicity in general, residues, etc.), for not to follow the instructions in the label.
